HAIRSKEEN HAIR SYSTEMS

INTRO

Thrown into the world of hairdressing at a young age, Éric Famechon created Cosmecare in 1995 with the ambition of making it one of the world leaders in hair replacement. Thanks to his know-how and technical expertise, the company has continued to evolve to offer hairdressing professionals ever more efficient and innovative products. Each hair system is meticulously crafted and the hair is carefully selected to provide optimal customer satisfaction. In Lace, Skeen or Hybrid, our systems all benefit from the most advanced technology in the hair replacement industry. Hairskeen offers the guarantee of a wide choice of systems and colors with unique and personalized pieces, with a completely natural look.

To better meet your needs and the needs of your customers in the current economic climate, we offer you new systems.

BASE

TECHNOLOGY

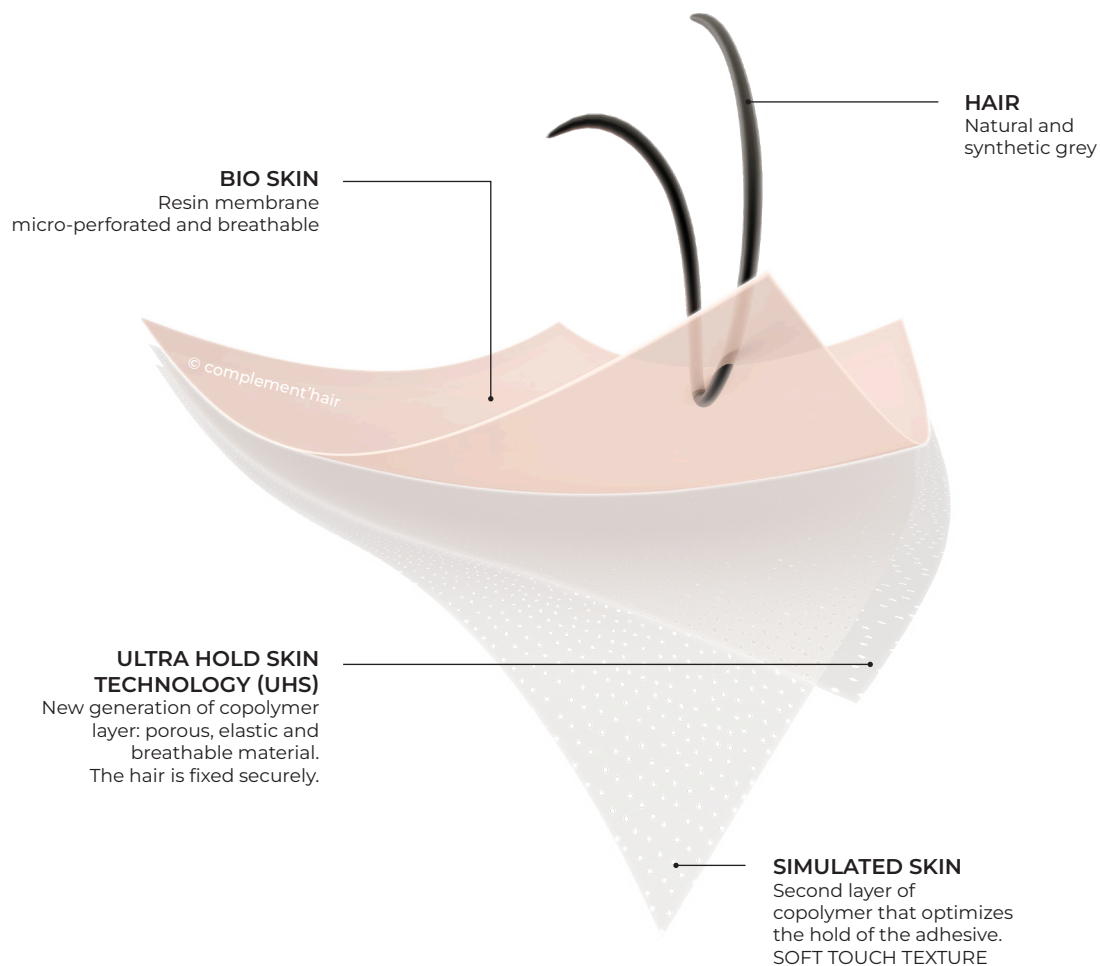

SKEEN

COLLECTION

With an undetectable front line «Fashion Hairline», our Skeen systems offer an ultra-natural look. Extremely fine, they provide a «second skin» effect to the customer.

Composed of 3 layers of over lapping copolymer, this high-tech membrane guarantees better holding and durability of the hair.

+ THIN + COMFORTABLE + NATURAL LOOK

NEW TECHNOLOGY

Inspired by the latest techniques in hair transplantation, our **INDIVIDUAL INTEGRATION** method is unique, specific and innovative.

Each hair is implanted one by one into our evolving membrane in a specific direction and orientation that requires years of development, know-how and experience. Once the hair is anchored in the membrane, it is then secured to ensure it stays in place for the customer's comfort.

REAL SCALP
ENLARGED PHOTO X 60

ATTACHED MEMBRANE
ENLARGED PHOTO X 60

UNIQUE EXCEPTIONAL

The **INDIVIDUAL INTEGRATION** implantation allows a totally undetectable rendering even when enlarged to 60 times.

PERFECT JOINT

The thinness of the membrane and the integration of the hair allows a perfect and natural connection for the most modern hairstyles.

NATURAL LOOKING FRONT HAIR LINE

Implanted by hand, without knots, the border is totally imperceptible.

It is just perfect and incomparable.

SKEEN COLLECTION

Our Skeen Systems offer different densities, allowing for better integration with the hair. They blend perfectly with the remaining hair of the customer.

MEMBRANE
in **stretchable copolymer**
micro ventilated.

LACE

COLLECTION

Our Sonic Lace systems are made of a polyamide base welded to the mesh. The versatile knot used during the ventilation of the hair makes variable hair style possible. Flexible and transparent, the Sonic Lace systems are also characterized by their great lightness and the extreme comfort they provide to the customer.

Our Hybrid systems feature a Lace base.
For a full Lace base, please consult your professional to order.

+ NATURAL + INVISIBLE + DURABLE

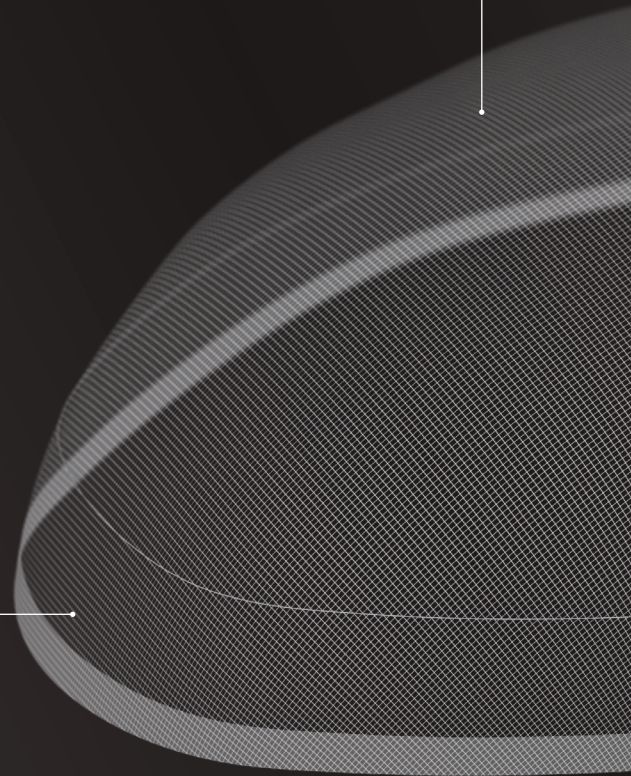

LACE COLLECTION

Our Lace Systems are distinguished by their density level. They offer a slightly higher density and provide just the right amount of hair for people looking for a perfect fit.

NATURAL
FRONT HAIRLINE
« **Fashion Hairline** »
For a very natural look.

SONIC LACE
Polyamide frame
thermo-welded
ultra resistant.

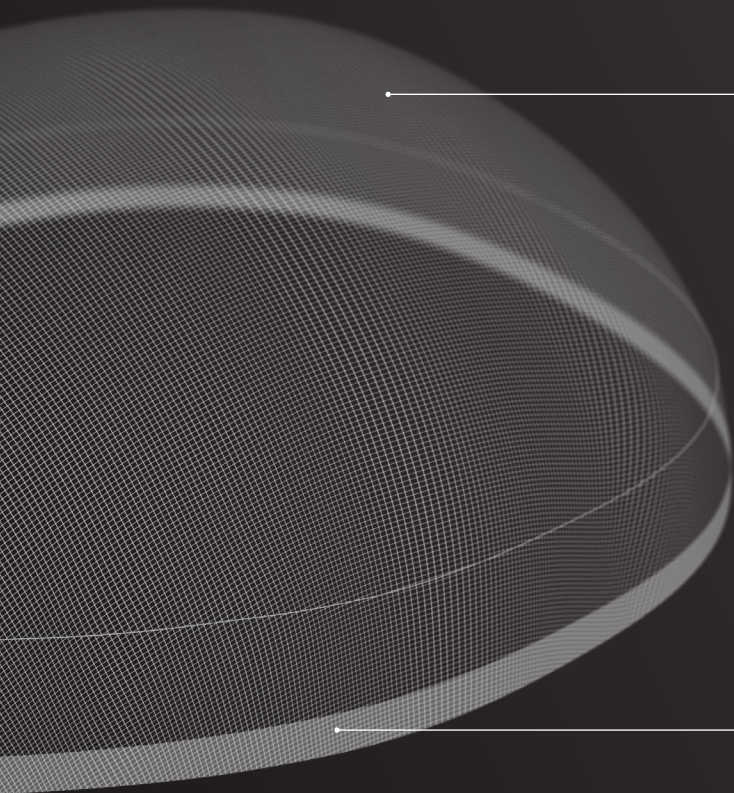

VERSATILE INVISIBLE KNOTS

Allows all types of hair styles.

Hand made ventilation of the hair.

½" FRONT EDGE
of **lace** without hair.

COLORS

BY SYSTEMS

Our color chart covers most of clients' needs.
For additional options, you can order a custom system through your professional.

Hairskeen color code:

Code Structure: LEVEL + TONES + GREY PERCENTAGE

Except for Color 17 = Level 8, Color 18 = Level 9 and Color 20 = Level 10

Tones: B = Brown | M = Matte (Blue Base) | ASH = Green Base | Y = Yak | R = Red

For example:

Color 510 = Level 5 + 10% grey

Color 1B20 = Level 1 with Brown Tones + 20% grey
